Greg/Eric,

Please find attached flight lines and a mission order for flight ops today starting 1530. The proposal calls for using the flight lines generated yesterday with the following modifications. We fly the first 4 lines over White Rock, 3 lines over the area east of highway 4, and first 4 lines over city of Las Alamos. These lines will provide enough coverage to process rad contours, exposure and sigma plots.

Also propose to fly line 3 for each target area for chem and IR. This provides enough buffer so all imagery is not on Las Alamos National Lab property.

If approved, estimate about 1.5 hours wheels up to down. Subsequent flight missions will be expanded per our direction. The goal of the first mission is to get data on the board and test coms for the deployment. I am prepared to make any changes necessary for the mission today.

Thanks

Mark Thomas
